## "I want an IT Department without the overheads!"

IT is a business essential – a dream when it works OK, a nightmare when it doesn't. Whether you are upgrading your IT equipment, moving offices or experiencing an IT problem of any kind, you need someone you can call on to sort things out immediately.

Choose OnIT as your outsourced IT Department, so our experts can be on hand whenever you need us. Our comprehensive list of services includes:

- **Support and Problem-Solving**  
Whether remotely or on-site, we can solve any IT problem quickly and cost effectively
- **Protecting Your Data**  
Ensure your valuable data is safe with our backup and disaster recovery solutions
- **Need New Kit?**  
We can advise and supply the best hardware and software for your needs
- **Moving Offices?**  
We can make sure your office move goes without a hitch
- **Improved IT Infrastructure**  
We'll install or replace servers and configure networks, including remote access and Virtual Private Networks (VPNs)
- **Stay Secure**  
Ask us about antivirus, firewalls and Unified Threat Management (UTM) for your security

## how much? >>>

Just tell us what you want and we'll provide a tailored quotation
